## **DC Water and Sewer Authority Selects Infrastructure Management Group, Inc. for Strategic Planning Consulting Services**

**Washington, DC, September 28, 2005** – DC Water and Sewer Authority (DC WASA) has awarded a contract to Infrastructure Management Group, Inc. (IMG Team) to update and strengthen DC WASA's Strategic Plan for 2005. "Being selected for this project demonstrates the enormous faith the DC WASA selection committee has in the people we've brought together to form the IMG Team", says Steve Steckler, President of IMG.

The IMG Team will begin its effort with reviewing past work, conducting interviews with the Chairman, Principal Board Members as well as alternates, General Manager, and senior staff. The interviews will provide information of the successes and lessons learned from the current strategic plan, while identifying potential directives and initiatives for the updated one. The next phase of the project approach will be for the IMG Team to facilitate an off-site workshop for open discussions of all attendees. The output of the workshop will serve as a basis for the update of the strategic plan. The IMG Team will consolidate information, and then present these findings to the DC WASA leadership.

The dedication of the DC WASA staff along with the IMG Team working closely together to finalize the updated strategic plan for 2005 will provide direction for DC WASA in developing their policies, performance goals, budgets, and work plans.
